Seeking adults aged 18-35 and 60-90 for an in-person study of cognition and aging. Eligible participants will receive up to $175 for completion of all study activities.

You may be eligible for a study that aims to better understand the relationship between cognition and Alzheimer's disease risk. In addition to cognitive testing, an fMRI scan, and a blood draw, participants will be asked to use two smartphone applications outside of the lab for about 10 days. Participants will receive monetary compensation for their time.
